

Tapeless Intravenous Tube Restraint

Unyielding Strength. Unparalleled Comfort.

LINEBACKER® is a revolutionary device that secures IV tubing to a patient's limb in a way ordinary medical tape cannot. Linebacker® is quick and simple to apply, and locks the IV line in place with a secure hook and loop closure. It provides superior comfort, preserves skin integrity, and eliminates opportunity for accidental IV dislodgement.

A disposable, single patient use device, the Linebacker® protects patients and health care providers by lowering the number of IV restarts and minimizing the possibility of tape-related infections, open sores, skin irritation, and possible leaks in health care provider's gloves.

Research shows emergency medical service (EMS) professionals and those serving in remote, tactical military locations are faced with less than perfect conditions and routinely see tape fail to perform. Linebacker® is more reliable than tape under wet conditions such as heavy bleeding, profuse perspiration, or inclement weather. In addition, it offers superior comfort to patients and performs well during patient transport.

- Linebacker® is 260% stronger than tape.
- Linebacker® is latex free, ensures a quick and painless removal, and eliminates the potential for skin infection.
- Linebacker® won't stick to and tear protective gloves and garment.
- Linebacker® is more reliable in wet conditions, such as blood, sweat, rain, and mud.

Applying Linebacker®:

Step 1: Peel back protective film

Step 2: Place IV tubing on adhesive and fold over

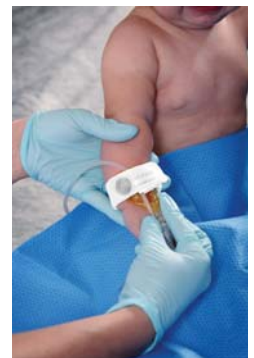

Step 3: Wrap strap around limb and secure

Visit www.morrisonmed.com for demonstration video.

Linebacker NEONATAL® and Linebacker PEDS® were developed as a more comfortable alternative to tape when securing IV tubing on infants and children.

Linebacker NEONATAL® measures 7 inches and is the perfect choice for infants and toddlers. Linebacker PEDS® measures 9 inches and is suitable for children and young adults.

Item	Description
8000	Linebacker®, Original, 1" x 18", Box of 24
8001	Linebacker®, Original, 1" x 18", Case of 16 Boxes
8000N	Linebacker NEONATAL®, Box of 24
8001N	Linebacker NEONATAL®, Case of 16 Boxes
8000P	Linebacker PEDS®, Box of 24
8001P	Linebacker PEDS®, Case of 16 Boxes

Also available in IV Start Kits. Call for details.
